Total appropriations, increase or decrease in $1000 114

INTRODUCTORY STATEMENT

Considerable attention has been directed to the desirability of public works as a source of employment in times of economic depression. When an attempt was made to institute such projects with speed under the Federal Emergency Public Works Administration it was found that few communities had developed intelligent or adequate programs for future needs.

When such general programs existed they were frequently vague in details, unbalanced in emphasis, and ill-considered in relation to future requirements.

A carefully planned comprehensive public works construction program may have great value in creating a reservoir of work either for times of depression or for any other contingency where expansion or contraction appears desirable for the welfare of the community.

The Maryland State Planning Commission has under consideration, therefore, a Public Works Construction Program for the State of Maryland and recommends the creation of similar plans by local subdivisions.

At the inception of such a program a number of questions immediately arise, the more significant of which are:

1. How much can a community afford, or be expected, to spend during a long term period.

2. What has been the attitude of the various communities toward the development of their possibilities.

3. What are the attendant costs other than the costs of construction.

4. What are the possible fields in which public work construction can be planned.

5. What is the desirable ratio for the distribution of expenditures among the various classifications.

Some light on these and other questions may be obtained by a study of past activities. For this reason, in the interest of orderly future public work construction programs, the Maryland State Planning Commission issues the present report on the Ten Years' Expenditures for Public Works Construction in the State of Maryland, during the years 1924 to 1933.

In this respect no attempt has been made to analyze or comment on the facts disclosed. The material is made available for record purposes in connection with future possibilities. The years covered do not include those in which the Federal Government has released sums for the construction of public works.

The items have been listed in the order of their financial magnitude, considering construction and maintenance only. When the charges for construction represent only a portion of the expenditures necessitated by public improvements, a tabulation showing the total amount involved has been included in the appendices. This has been done, for example, in School Expenditures, where a charge for new construction may carry with it an increased cost of operation.

In other cases, as that of Highway Expenditures, where the cost of construction and maintenance represent practically the entire expenditure, no attempt has been made to include other than these two items.

In a few instances an estimate has been made in order to complete the ten year period and occasionally an arbitrary division

of a total expenditure into construction and maintenance charges has been made. In every case such approximations have been indicated.

The appendices carry a tabulation of the total receipts, expenditures, debts, etc., of the various political units.

The public should be interested in this accounting of its past expenditures. It may even be led to insistence upon the creation of an orderly future program, the timing and expense of which it may wish to authorize in advance.

The present report tells us "where we have been" and may motivate the citizens of Maryland to interest themselves in "where we are going" with the tax dollar.

Abel Wolman

Abel Wolman,
Chairman,
Maryland State Planning Commission.

March 30, 1936.

Highways

The material presented under this heading falls into three classes: the expenditures of the City of Baltimore, the Counties of Maryland, and the State of Maryland.

For the City of Baltimore the amounts for the construction of Highways were taken from the records of the Bureau of Control and Accounts. In these figures the construction costs of bridges were included. From the reports of the Department of Public Works the costs of bridges were obtained. Subtracting the latter from the former gave the net cost of highway construction. The Commission on Governmental Efficiency and Economy in the report on the Funded Debt and Public Improvements of the City of Baltimore gave the total amount charged against highways. Subtracting the amount reported by the Bureau of Control and Accounts gave the cost of land purchased for highways. The expenditures for the maintenance of highways were obtained from the reports of the Department of Public Works. For 1924 the separation of the total into construction and maintenance charges was estimated.

For the Counties of Maryland three sources were used. By questionnaires to County Treasurers it was possible to find the amounts spent by eight of the counties, incidentally the ones spending the greatest sums. From the Reports of the State Legislatures the approved county bond issues for highways were tabulated. From the reports of the Maryland State Department of Education the annual appropriations of county for highways was obtained. In the compilation of information the reports direct from the county were used whenever possible, otherwise the bond issues and annual appropriations were used as the amounts expended. Unfortunately most counties do not separate the costs of bridges from their highways, neither do they separate maintenance from construction. In the following division it was assumed that bond issued were expended entirely for new roads and that the annual appropriations were divided seventy per cent maintenance and thirty per cent construction. For this reason the separation may be questioned, the total spent, however, cannot be much in error.

The expenditures by the State Roads Commission for the State of Maryland are obtained from the accounts of the Commission. They are divided into the two charges, maintenance and construction, and represent funds derived from the lateral gasoline tax, the state general gasoline tax, the post roads subsidy from the Federal government, and from county bond issues.

SUMMARY SHEET FOR HIGHWAY EXPENDITURES (By years)

In the county distribution, bond issues were assumed 100% construction: budget appropriations 70% maintenance and 30% construction; and city expenditures 60% construction and 40% maintenance.

State Roads Commission.

Expenditures for Maintenance and Construction. The States Roads Commission of Maryland for the years 1924-1933, inclusive.

The revenue is derived from the lateral gasoline tax, the state general gasoline tax, the post roads subsidy from the federal government, and from county bond issues which are guaranteed by the counties share of the gasoline tax.

Tabulations by which the annual expenditures for Highways in the counties were determined. The actual expenditures reported by the counties were used when known (see the first eight on the list). When no report was available the bond issues were added to the annual appropriation in budget. Bond issues were assumed 100% construction. Other funds were assumed--for towns 60% construction, 40% maintenance; for counties 70% maintenance, 30% construction.

Schools.

All the figures for education for Baltimore City and the Counties are taken from the annual reports of the Maryland State Department of Education. Two summary sheets are given; one divided into construction, which includes equipment and land purchases, and maintenance; the other is divided into current expenditures, which includes maintenance; debt service; and capital outlay.

The budgets for each of the Counties, Baltimore City, and the State of Maryland, are totaled for each of the ten years, 1924 to 1933. This table is accompanied by studies showing trends in expenditures.

A table is given for each of the ten years showing, first, capital outlay, subdivided into buildings, equipment, land, and a total which besides these three classes includes incidental capital expenditures; second, the charge for maintenance, and the current expenses, the principal contributing item of which is the salary outlay; and third, the expenditures for debt service, which represents the interest, sinking fund and redemption requirements of the school bonds. It is impossible to separate the capital outlay of the State of Maryland.

In addition to the reports of the Maryland State Department of Education, the expenditures by the State of Maryland were obtained from School Bond issues authorized by the State Legislature, from the amounts in the General Construction Loans assigned to educational purposes, and from the reports of the State Comptroller. The former two are essentially capital outlay, the latter represents the sums spent on the several State Institutions, and the state's contribution toward the county school budgets.

The tabulation has been given in such detail as a complete understanding of the possibilities cannot be had without the knowledge of the costs involved in the operating, servicing, and maintaining of the structures once they are erected.

In addition to the above financial data there has been included a tabulation of the school population as information of interest in the general study of schools.

Water

The figures covering the expenditures for the City of Baltimore have been obtained from the report of the Commission on Governmental Efficiency and Economy. The figures for maintenance are from the report of the Department of Public Works.

The expenditures for water supply improvements outside the City of Baltimore are obtained from the Maryland State Department of Health. These figures have been divided into expenditures for State Institutions, Metropolitan Districts, and various communities, the latter two being totaled under counties.

No data on maintenance are available outside of Baltimore. As an estimate the ratio between construction and maintenance for Baltimore City was used to determine the maintenance charges for the Counties, and the State.

*Estimated

The ratio of the above maintenance to the capital expenditure is used for an estimate of the maintenance charge for county and state expenditures on water.

Sewers:

The capital outlay for sewers for Baltimore City is taken from the Report of the Commission on Governmental Efficiency and Economy (Funded Debt and Public Improvements of the City of Baltimore). The maintenance charges are largely an approximation. The Department of Public Works records the expenditures for maintenance and operation of the sewer system from 1925 to 1932 inclusive, but does not separate maintenance from operation. In 1933 the system was changed and the figures given for maintenance distinct from operation. Using the ratio of maintenance to operation for 1933 the totals from 1925 to 1932 were divided into the two charges.

For the state outside of Baltimore, the figures are taken from the reports of the Maryland State Department of Health, Since these figures represented only the expenditures for improvements, the ratio used in the estimate for Baltimore City was used to compute the maintenance charges in the counties and the state.

SEWER EXPENDITURES

Baltimore City
The operating costs for 1933 were $373,825
The maintenance costs for 1933 were 45,815
$419,100 of which 10.9% is the maintenance charge.

This percentage is used for the separation of maintenance and operation charges for the years 1925 to 1932.

	Operating Expenses	Maintenance	Construction	Total
1924	400,000*	49,000*	2,441,517	2,890,517
1925	403,304	49,500	3,367,097	3,819,901
1926	422,250	51,700	2,948,415	3,422,365
1927	440,558	54,000	3,201,529	3,696,087
1928	436,146	53,500	2,459,262	2,948,908
1929	464,743	57,000	2,365,243	2,886,986
1930	472,244	57,600	2,645,122	3,174,966
1931	431,804	53,000	2,501,080	2,985,884
1932	291,587	35,800	1,698,463	2,025,850
1933	373,285	45,700	1,260,096	1,679,081
Total	4,135,921	506,800	24,887,824	29,530,545

The ratio of the above maintenance to the construction expenditure is used for an estimate of the maintenance charge for counties and state.

*Estimated.

Public Buildings.

The figures for Baltimore City covering the expenditures for Public Buildings have been assembled from the report of the Commission on Governmental Efficiency and Economy, and from the records of the Public Improvement Commission. The maintenance on the Public Buildings has been obtained from the report of the Department of Public Works. The total for 1924 was estimated. After 1927 the sum was divided between minor and incidental maintenance charges and major maintenance expenditures.

The amount spent by the counties has been assumed as equal to the value of the Bond Issues authorized by the State Legislature.

The expenditures by the State of Maryland for Public Buildings have been secured from the General Construction Loans of 1924, 1927, 1929, and 1931. The annual distribution was computed by assuming the same rate for the building construction items as was determined for the entire loans. Since the Construction Loan of 1931 was only fifty-nine per cent spent, this ratio was used in separating Public Building Construction from the rest of the loan.

No maintenance costs can be obtained for either the counties or the State of Maryland. The same proportion existant for Baltimore City was assumed for the remaining two divisions.

State of Maryland Construction

The total appropriations for buildings of the General Construction Loans of 1924, 1927, 1929 were divided into the annual expenditures as shown below in the same proportion that the total General Construction Loan was spent annually.

	1924	1925	1926	1927	1928	1929	1930	1931	1932	1933
1924-533	75,898	1,768	.....	.....	.....	.....	.....	.....	.....	.....
1924-280	82,000	280,000	403,000	193,000	17,600	3,400	.....	.....	.....	.....
1927-345	.....	.....	.....	470,000	1,225,000	463,000	192,000	90,000	8,000	.....
1929-132	.....	.....	.....	.....	.....	74,200	1,020,000	854,000	225,000	17,800
1931-253	.....	.....	.....	.....	.....	.....	.....	170,000	1,340,000	1,010,000
	157,898	281,768	403,000	663,000	1,242,600	540,600	1,212,000	1,114,000	1,573,000	1,027,800

The Const. Loan of 1931 was only 59% spent by 1933. The amount for Public Buildings in the loan of 1931 was assumed 59% spent. The annual Distribution is at the same rate that the Const. Loan of 1931 was spent during 1931, '32 and '33.

PUBLIC BUILDINGS
Counties of Maryland - Construction

The following figures are the amounts of the bonds for public buildings which the General Assembly of Maryland granted the counties authority to issue.

From Bond Issues	Allegany	1924	50,000
		1931	60,000
	Harford	1929	35,000
	Kent	1927	25,000

	284,932	1,166,257	1,918,189

From the Report of Department of Public Works.
The ratio between the construction and maintenance costs for Baltimore City has been used for the State of Maryland and the Counties.

Bridges.

The tabulation for Bridge Expenditures is the least complete of the report. The figures for Baltimore City, taken from the report of the Department of Public Works, are reliable, both as to construction and mainenance charges.

The figures for the Toll Bridges as obtained from the reports of the Public Service Commission of Maryland, are reliable.

The State of Maryland and the counties have included their expenditures for bridges in with their highways costs. As such the totals of the two classes will be correct but the separation of bridges from highways cannot be satisfactory.

Operating cost - include Maintenance & Dividends

Light and Power.

There are not many Light and Power Plants of any magnitude in Maryland. In most of the communities they are privately owned and as such have no place in this report on public works.

In the towns of Berlin, Centerville, Easton, Hagerstown, Thurmont, St. Michaels, and Williamsport the utilities are owned by the municipality. The detailed reports obtained from the Public Service Commission of Maryland are herewith included.

The reports, as such, are not particularly satisfying as some of the reports are rather incomplete. They give in addition to the expenditures for construction and maintenance, information concerning the financial status, both as to capital investment and present conditions.

LIGHT AND POWER PLANTS
Summary Sheet

Made up of plants at Berlin, Centerville, Easton, Hagerstown, Thurmont, St. Michaels and Williamsport.

PARKS.

There is a number of Parks in the State of Maryland in various communities. Questionnaires sent to Cumberland, Hagerstown, Havre de Grace, Salisbury, and Cambridge, among others have received no answers. As a result the following figures are confined to the City of Baltimore and the Maryland National Capital Park and Planning Commission.

The figures for Baltimore City are given in great detail, covering operating expenses, land acquirements, debt service, and construction and maintenance costs.

While, as indicated, the report is rather incomplete in terms of number and distribution of park areas, the expenditure herewith tabulated is a great proportion of the total spent in the state for this item.

Summary Sheet.

OTHER PUBLIC WORKS

This classification includes all the miscellaneous items not covered in the previous sections.

The report for the City of Baltimore is accurate and complete as far as totals are concerned. For the Counties and the State of Maryland the bond issues approved by the General Assembly have been used as the monies spent. Such approval does not necessarily mean the borrowing and spending of money so for this reason the expenditures listed under the Counties and State of Maryland are not accurate. Since, however, the expenditures from short term notes and budget appropriations cannot be included, any over estimate from the former assumption should be in some measure offset by the subsequent omissions.

It will be noted that the expenditures of the Civil Works Administration and the Public Works Administration contribute one million four hundred thousand dollars to the total. While this sum was spent by the Federal Government, it represents a charge which will ultimately, in large measure, revert to the citizens of Maryland.

The expenditures have been classified entirely as construction. It has been impossible to determine what portion, if any, of the expenditures listed should be charged to maintenance. Examination of the Baltimore City items discloses that the money spent was for the most part undoubtedly spent for construction. Since bond issues are not used for maintenance, the assumption for the counties and the State of Maryland is also justified.

Summary Sheet.
